

# **2017 NGI Industrial Affiliates Meeting and Research Review**

**8 & 9 November 2017**

**Stanford University, Stanford, California**

The Stanford Natural Gas Initiative Annual Meeting brings together a range of external stakeholders and the Stanford community to hear from leading researchers and thought leaders and to discuss a range of important topics related to natural gas production and use and the associated environmental, social, and economic benefits and costs. The 2017 meeting will feature speakers and panelists from Stanford, NGI member companies, and invited guests.

## Key Topics to be Addressed

- 1. The Current and Future Global Natural Gas Resource Base**
- 2. Global Gas Markets and Governance**
- 3. Energy Access in the Developing World**
- 4. Big Data and Machine Learning in Natural Gas**
- 5. Technological Innovation in Natural Gas**
- 6. Natural Gas Leakage and Emissions**
- 7. Integration of Natural Gas, Renewables, and Storage**
- 8. Future Research Directions in Natural Gas Science, Engineering, Policy, and Business**

The NGI Industrial Affiliate Meeting will be held in association with two NGI workshops:

November 7th: Workshop on Methane Conversion to Liquid Fuels and Chemicals

November 9th and 10th: Workshop on Unconventional Reservoir Characterization,  
Management, and Recovery Factors

*Members are encouraged to send appropriate attendees to all three meetings*

For information on attendance or to learn about Stanford industrial affiliates programs please contact  
NGI Managing Director Brad Ritts ([rittts@stanford.edu](mailto:rittts@stanford.edu)).
